9 January 1983

NOTE FOR: DDA

FROM: DCI

Harry:

Thanks for the material you sent me.  
It needs to be cut down and made less  
technical. The attached will indicate  
the style and degree of detail I want.  
See if you can get a few paragraphs  
drafted on the end on computers,  
training and other facilities that  
seem worthy of the President's attention.

  
William J. Casey

Support Facilities

The buildup and revitalization of our intelligence capabilities could not be accomplished without improved communications, computer capabilities and training facilities. We inherited a 1960 vintage communications network. Without computers capable of employing technologies and capabilities of the late eighties even doubling intelligence personnel to the level of the 1960s would not have been enough to keep up with expanded range and complexity of today's intelligence needs. Recruiting and training facilities could not bring on people fast enough or give them the range of skills required by the rebuilding. [REDACTED]

25X1

25X1

The CIA communications system, in addition to being slow, its capacity saturated and its reliability increasingly in question as old equipment began to fail, [REDACTED]
